

International Private Lease Circuit (IPLC)

MainOne offers businesses a cost effective, high quality, secure and reliable solution to their high-speed connectivity needs. Our IPLC service is a highly scalable and resilient point-to-point or point-to-multi-point leased line circuit solution that delivers high speed connectivity right across Africa, Europe and the rest of the world via our wholly owned fiber network and various partner agreements to guarantee connectivity to anywhere in the world

Key Features

- With IPLC your company can have the high-speed, continuous connectivity required for redundant computer operation and remote backups.
- IPLC Service can be used to connect local area networks (LAN) providing transatlantic access to corporate resources.
- With high reliability and available bandwidth, IPLC Service can be used for remote file up/downloads.
- With nearly instantaneous transmission and high availability, IPLC Service for broadcast quality video-conferencing can lower travel expenses and ensure that remote offices feel connected.
- Your company can compress multiple voice channels over a single private line to lower your international communications costs; MainOne's IPLC Service can be used with data encrypting devices to help ensure that conversations are secure.
- With near instantaneous connectivity, IPLC Service is ideal for engineering and scientific applications.

Key Benefits

- **Multiple Interface Options:** SDH, SONET, Ethernet (High Speed Ethernet Private Leased Circuit)
- **Flat rates and term pricing:** Economical flat-rate prices and term pricing help companies' budget expenses.
- **Alternate Routing:** Alternate routing gives company's diverse and redundant network routes.
- **Dependable Connectivity:** Delivers flawless voice and data transmission among your international locations through MainOne's extensive undersea network of fiber-optic cables.
- **Reduces Operating Costs:** Access is provided to the full bandwidth of the circuit 24 hours a day with flat-rate competitive pricing.
- **Around-the-clock network monitoring and Service Level Agreements (SLAs):** Main One uses 24x7 network maintenance and monitoring, strong alliances with international partners, high-performance circuits, and SLAs that guarantee reliable service and provide rebates for missing circuit availability and on-time provisioning measures.
- **Faster Provisioning:** Established relationships with the world Tier-1 providers help to ensure timely installation of the local access and international circuit.
- **Flexible Contract Terms:** The options of a 1, 3, 5 year contract OR an Indefeasible Right of Use (IRU) option of a 15 year contract.
