

About MainOne

MainOne is West Africa's leading connectivity and data center solutions provider. We are the first choice for wholesale internet, enterprise services, cloud solutions and managed data services for businesses with global-scale ambitions.

MainOne's world class infrastructure includes a private 7000km submarine cable system from Europe running down the coast of West Africa, a next generation IP NGN network and a growing regional and metro terrestrial fiber optics network. We operate the only Tier III certified data center in West Africa with ISO 27001 and PCI DSS certification. Our network is connected to internet exchange points across the globe including IXPN, GIX, LINX and AMiX.

Our cost effective and innovative solutions are developed in a collaborative manner such that businesses that partner with us are fully empowered to meet the needs of today's market and also prepare them for tomorrow's growth opportunities.

SME-IN-A-BOX

Starting or running a business can be difficult, but choosing the right internet partner shouldn't be.

Let us help you grow your business by connecting you to world class solutions and opportunities.

MainOne

MainOne's SME-IN-A-BOX is a bundled service specifically designed to provide high speed internet, crystal clear fixed voice solutions to small and medium enterprises in Nigeria. Our solution is a simple to use, plug and play service that helps drive business growth, productivity and profitability without compromising quality and value for money.

MainOne's SME-IN-A-BOX solution delivers:

- Bundled Internet and voice services delivered over a single fibre optic connection
- Crystal clear voice calls
- Free voice calls between multiple on-net locations
- Web self-care portal for real time traffic monitoring and payments
- Competitive local and international voice call rates
- Ease of use, Wi-Fi enabled modem with no technical expertise required.
- Dedicated support for optimal service availability

How the SME-IN-A-BOX Solution Works

Upon sign up, a MainOne certified engineer will install our modem at your office and connect you to our highly reliable and resilient fibre optic technology powered network. The internet and voice services will be provisioned and tested and you get access to our network almost instantly. The modem is also a fully functioning wireless router that can act as an Access Point for Wi-fi redistribution within the office. The service comes with at least one static public IP address. An optional professional service is also available for a managed Wi-fi or LAN deployment within the office complex.

MainOne's SME-IN-A-BOX solution delivers the best in-class and highest quality performance possible over broadband fibre connection to help drive your business growth and efficiency.

Why SME-IN-A-BOX?

High Quality: Enjoy the opportunity to access the same good quality broadband internet and voice services available to big businesses at affordable prices

Unlimited Data: Never run out of data before the end of the month

Low call rate: Enjoy competitive call rates to local and international destinations

Enhanced Growth: Our solution helps you drive the growth of your business through quality connections to your customers, business partners and employees wherever they are

Improved efficiency: Your business operation is powered through reliable and faster internet connections.

One-stop-shop Solution: A bundled service that can grow and adapt to your unique business needs from a single fibre connection.

Customer Support: Superior quality of experience through a dedicated support team
