

Global Video Connect

MainOne

Optimise your end users' viewing experience with Main One's Global Video Connect. Built on the world's most advanced, dedicated video network, Video Connect offers constant bandwidth availability and video transmission on 4x protected fibre paths to ensure seamless video delivery.

Key Advantages;

- Dedicated Global Video Network -
- Optimize video delivery and revenue
- Round-the-clock Video Network Operations Centre
- Maximum Uptime
- Global Distribution and reach
- On-demand solution with flexible pricing

KEY FEATURES

Highly scalable and end-to-end managed DTM network built on IEEE specifications on Tata Communications wholly owned fibre backbone.

Supports media interfaces like DVB-ASI, SD-SDI and HD-SDI irrespective of compression formats like MPEG-2 or MPEG-4 or JPEG 2000 to eliminate packet losses during transit over DTM platform

Low latency for excellent video transmission

Multi casting capability for all services and topology

Dedicated video NOC and round the clock availability, backed by best in class SLAs.

KEY BENEFITS

Fully customized services which can be tailored to meet your needs.

Diverse and protected. Assures delivery with four redundant fibre paths.

Available on-demand basis

Dedicated Video NOC. 24x7x365 monitoring and management of video traffic.

Supports multiple media formats with no need for converters.
